# CUBA NEEDS SUPPORT

DANGER LIES IN OLD PREJUDICE

With Free Rein, Conflicts Between Cubans and Those Whom They Regard as Their Oppressors Under Spanish Rule Might Result - While United States Is Pledged to Grant Free Government, a Protectorate Is Still Needed-Life and Property Safe.

Brig. Gen. Fitzhugh Lee, who arrived in Washington from New York late Sat-urday night, discussed the social, politi-mands is that the church property be conan interview yesterday. Gen. Lee believes that under the existing protectorate of the United States Cuba is improving every hour. He says there is little friction of any kind in the island and that the peonany kind in the island in the isla ple there are slowly but surely rebuilding their war-wasted homes and repairing their crippled fortunes. He thinks that life and property are secure in Cuba and that the Cubans generally are not abusing

Conditions Are Improving. "Cuba, on the whole, is doing well," be-

Then, of course, there might follow conflicts of a deplerable chargerer. That receiptions a deplerable character. That prejudice is to-day general throughout the island.

Protectorate Should Continue. "I am aware that the United States government is pledged definitely to grant dependence to Cuba, after the island has been pacified, and I believe that promise should be fulfilled just as swiftly as we can, in reason and justice. This government has, in a measure, taken upon itself responsibility for the future success of the island, and we are enjoined by every consideration of duty and expediency to vouchsafe to the people there an opportunity to presper, naturally and without unnecessary obstacles. For that reason the United States should continue to protect life and property in the island, and to insure for the people the blessings of civ ilization, just so long as that protection

is made necessary by the peculiar social and political condition of the people. "It is needless to say that the industrial prosperity of Cuba depends wholly upon the manner in which the law is respected by the inhabitants. A state is no spected by the inhabitants. A state is no better than what its people make it, and its prosperity is determined by its political and social conditions. If Cuba is to be prosperous, she must recognize and abide by those standards which obtain in civilized communities. The right to live, to acquire, and keep what is honestly acquired, must be recognized throughout Cuba as fixed, if the great resources of the island are to develop.

Assurance Is Needed. Assurance Is Needed.

"The industrial situation is improving. Tobacco has yielded satisfactory results this year. The future sugar erop will depend largely on the amount of capital which goes to the island to rebuild the machinery destroyed by war. This maexpensive, and much money is required to operate sugar plantations Money is going into Cuba gradually, but nothing like as fast as it would if investors were sure that property would of Havana. Many thousands visited Cato enforce law and order.

"Cuba is an exceedingly attractive field adaptable and thrifty. They are rebuilding aiready to some extent their war-wasted homes and repairing their crippled fortunes, and will continue to do this patient ly and perseveringly if given a fair chance and not disturbed by political agitation. Nothing can retard the sure development of the island but an unwise and illiberal administration of its government. With-fixed conditions, and the assurance that law will be respected and life and prop erty made secure, the Cuban people will under the wise protection of the United States, steadily improve their social, po-

the people. "General," said the reporter, "do you think the people of Cuba would be capable of self-government if the United States redeems its pledge and permits them to organize a Cuban republic." The General laughed and said: "I am not answering conundrums."

Gen. Lee expects to go to Richmond tonight to witness the launching of the Shubrick, but will return to Washington Wednesday.

The value of the church and monastery of a town cems to be equal in many cases to the alue of all the other buildings in the town. The more I talk to the people, the more I am convinced that the insurgents are actuated, in a measure, by a spirit of communism, and in their talks, their most serious objection to the church seems to be the fact that ecclesiastical or ganizations own so much of the property.

STUDY OF THE ANGELS

Dr. Talmage's Discourse on the Brilliant Hosts.

Swifter Than the Cyclone and More Numer ous Than the Human Race They Defend, Cheer, Rescue, and Give Victory to the Right-Special Body Guard for Every One -Sent Forth by God to Help in Battle Against Sin and Death-Final Triumph.

Rev. Dr. T. De Witt Talmage found the text for a discourse on "Angelology" yesterday in Judges, xiii:19: "And the angel did wondrously. The object of the sermon is to show

that the brilliant beings supposed by some to be imaginary are real, and have much to do with our every-day life. Dr. Tal-Fire built on a rock. Manoah and his

"There are two nations of angels, and they are hostile to each other; the nation of good angels and the nation of bal angels. Of the former I chiefly speak to-Their capital, their headquarters, their grand rendezvous, is heaven, but their empire is the universe. They are a distinct race of creatures. No human being can ever join their confraternity. The little child who in the Sabbath-school sings, 'I want to be an angel,' will never have her wish gratified. They are superhuman; but they are of different grades and ranks, not all on the same level, or the same height. They have their su-periors and inferiors and equals. I proose no guessing on this subject, but take the Bible for my only authority. Plato, the philosopher, guessed and divided angels into super-celestial, celestial, and sub-celestial. Dionysius, the Areopagite, guessed and divided them into three classes-the supreme, the middle, and the last and each of these into three other classes, making nine in all. Philo said that the angels were related to God, as the rays to the sun. Fulgentius said that they were composed of body and spirit. Clement said they were incorporeal. Augustine said that they had been in danger of falling, but now are beyond being tempted. But the only authority on this subject, that I respect, says they are divided into Cherubim, Seraphim, Thrones, Dominations, Principalities, Powers. Their commander-in-chief is Michael. Daniel called him Michael, St. John called him

As these superhumans are without bodies, these expressions are of course figurative, and mean swiftness. The Bible tells us that Daniel was praying, and Gabriel flew from heaven and touched him before he got up from his knees. How far, then, did the angel Gabriel have to dy in those moments of Daniel's prayer? Heaven is thought to be the center of the universe. Our sun and its planets only the rim of the wheel of worlds. In a moment the angel Gabriel flew from the center to this periphery. Jesus told Peter he could instantly have sixty thousand angels present if he called for them. What foot of antelope or wing of albatross could equal that velocity? Law of gravitation, which grips all things else, has no influence upon angelic momentum. Immensities before them open and shut like a fan.

"That they are here is no reason why ger point down to some world in trouble on the outmost limits of creation, and instantly an angelic cohort is there to help it. So these disciples, in special nearness to Christ, evidently believed that every worthy soul has an angel. Jesus said of His followers: "Their angels beheld the face of my Father.' Elsewhere it is said: 'He because, fearing assassination, he did no shall give His angels charge over thee, to go to Manchester, as it was his duty to keep thee in all thy ways.' Angel-shielded, angel-protected, angel-guarded, angel nopied, art thou! No wonder that Charles Wesley hymned these words:

"Which of the petty kings of earth Can boast a guard like ours, Encircled from our second birth With all the heavenly powers?
